

Tatura Trellis Strap

The Tatura Trellis Strap is designed to support young fruit trees and heavy fruit loads in strong winds. It locks on to trellis wires and prevents lateral movement of main limbs. Uniquely designed with a 'release clasp', it is easy to remove and reposition the strap to where support is needed as the tree grows.

Features and Benefits:

- Suits: up to 3.15mm wire. Length: 270mm.
- Strong and secure. Firm hold on wire.
- Adjustable and Re-usable. The unique 'release clasp' makes it easy to adjust or, remove and reposition the strap as the tree grows.
- Made from UV stabilised plastic. Durable construction for Australian conditions.
